

# Oasis Colon Hydrotherapy

## Detox Programs

The focus of our work at Oasis is Colon Hydrotherapy. Depending on the client's health condition and the condition of the client's colon, we may recommend effective and simple detox programs which complement colon hydrotherapy treatments, and support the client in maintaining optimal health. Such programs are undergone during a series of colon hydrotherapy treatments, and also include an Indican Test.

Let's assume that you are a picture of good health. You feel awesome and are not plagued by any known health or weight challenges. It is still important to understand why full-body, nutritional detoxing should be part of your overall health plan to help maintain the internal body and facilitate optimal health.

Our bodies have become virtual dumping grounds for the hundreds of thousands of toxic components that invade our air, water, and even the soil that nurtures our food.

Because of these important issues that are effecting all of us, full body nutritional detoxing is an essential part of maintaining our internal health, strengthening our vital organs and giving our body a fighting chance against environmental impurities and nutritional challenges.

***Full body nutritional detoxing is a hot topic with healthy individuals who understand the importance of quality of life and optimal health.***

We offer a range of detox programs, including :

*Inner Repair Program  
8 Day Tissue Cleanse  
General Detox Program  
Detox Maintenance Program  
Parasite Cleanse Program*

The most suitable program for you is dependent on your health condition. Please contact us so we can assist you in maintaining optimal health.
