

Oasis Colon Hydrotherapy

SERVICES OVERVIEW

The basis of our work at Oasis is Colon Hydrotherapy. We also offer programs and services which complement colon hydrotherapy treatments.

Colon Hydrotherapy

Colon Hydrotherapy is a time proven and efficient method of detoxifying the body, quickly and safely.

Ensuring the health of our colon is the most important step in maintaining or regaining overall health. We must ensure that our colon is functioning correctly, otherwise other parts of our body are threatened. The condition of the colon can affect the whole of the body.

All health issues can be assisted by Colon Hydrotherapy. Some of the issues which our clients have benefited from with colon hydrotherapy treatments are abdominal pain and discomfort, acne, arthritis, bloating, colitis, constipation, IBS, crohn's disease, digestive issues, diverticulitis, liver disorders, low energy, period pain, prostate problems and weight problems.

Before your first colonic, we do an iris reading to determine the condition of the colon. During the colonic treatment, we use filtered water with automatic temperature control, and include oxygen in the water. Oxygen destroys anaerobic bacteria and helps to heal any effected tissue in the colon.

Please don't hesitate to contact us if you have any questions about colon hydrotherapy treatments.

Detox Programs

Depending on the client's health condition and the condition of the client's colon, we may recommend effective and simple detox programs which complement colon hydrotherapy treatments, and support the client in getting back to optimal health. Such programs are usually undergone during a series of colon hydrotherapy treatments.

Weight Management Programs

Our weight management programs are simple and unique. The programs work because they address the important principle of nutritional cleansing, whilst undergoing a series of colon hydrotherapy treatments. The programs are weight loss AND cleansing oriented. They are a common sense approach to losing weight at a steady pace by cleansing, lowering caloric intake, and increasing physical activity. Whatever program you undertake, you have a system that can help you to reach your health goals and your target weight.

Other Services

We also offer other services such as Vibrosaun (sauna and massage in one comfortable package), Iconic Foot Detox Bath, Indican Testing and Massage Therapy.

Please see individual brochures for each of our services
